GILBRETH PURCHASES STATE-OF-THE-ART GRAVURE PRINTING PRESS

Croydon, PA: Gilbreth Packaging has purchased a state-of-the-art Rotomec Gravure shrink film printing press from Bobst Group USA Inc. as part of a strategy that offers packagers greater speed-to-market, quality and cost reduction supply chain efficiencies.

The Rotomec RS 4003 MP press currently features 10 printing units and, with a look towards the future, is engineered to offer 11 color capabilities.

The press offers complete job pre-setting capabilities, press diagnostics and an operator-friendly design for quick job make-ready and changeovers. An HDI (High Dynamic Interface) reduces waste and an innovative Total Automatic Pre-register (TAPS) System integrates film registration and press controls via a communication interface to achieve registration alignment. A precision electronic shaft (ES) system reads register marks and recalls job recipes to make on-press corrections five times faster.

Gilbreth, a pioneer in shrink film printing for over 40 years, offers a broad range of shrink labels; full body sleeves, tamper-evident neck bands and specialty anti-counterfeit sleeve labels.

Delivery of the new Rotomec press is expected in late 2006.
